

## EXHIBIT A

### Scope of Work

#### **PURPOSE**

The purpose of this Agreement is to formalize the Energy Commission's membership with E Source.

Annual E Source Technology Assessment Service membership benefits and deliverables to the Energy Commission include:

**Member Inquiry privileges** - Provides members with access to the knowledgeable researchers and analysts of the E Source research staff. When members need expert advice or an opinion on energy related issues or technologies they can call, e-mail or fax E Source with their questions.

**E Reports** – Online access to focused reports on end-use technologies and strategic and marketing issues that impact end-use customers. Every other month, members are notified that two to three new E Reports are available online.

**Members-Only Access to the E Source web site** - Provides members with the ability to: read, search, print, or download past and present E Source reports, access the E Source Technology Atlas Series, register for an E Source event, or pose an online question to any of our researcher staff.

**Participation in E Source Web Conferences** - Provides members the opportunity to take part in lively discussions with principal authors, industry experts, and peers from other member organizations. Teleconferences focus on current industry topics and recently published E Source reports.

**Tech News** – A monthly electronic list serve that provides members with timely updates and assessments on current end-use technologies.

**Emerging Technology Currents** – Online access to a quarterly publication that examines emerging technologies for end-users.

**E Source Technology Atlas Series** – Online access to what is widely acclaimed as the most comprehensive, unbiased reference work available on energy-efficient technologies. The five-volume set includes the following individual atlases: Lighting, Drivepower, Space Heating, Space Cooling, and Residential Appliances.
